

Automation Network and Protocol Conversion Solutions - Using Hilscher Products

Doc. No. ADPL/Brochure/Aut Sol/005; Rev. No. 00.00; Eff. Date.: 06.03.2026

Background

In every industrial set-up related to Automation and PLC system and network, there is always a requirement of interconnecting two or more PLC system networks or connecting a PLC system with LAN but the PLC system has no provision of Ethernet connectivity.

Now we have solutions to all your issues related to interconnectivity, Ethernet connectivity and protocol conversions with a wide range of innovative products from Hilscher (**Amossys Digital is now Hilscher India's authorised channel partner**).

Glimpse of Solutions to All Your Network and Protocol related Problems

Above are a few of the examples, what we can do to your network requirement with Hilscher products, there is a complete range of product and solution as per requirement and that is the answer to all your network related issues.

Key Features and Benefits

- A PLC system which has no ethernet connectivity can now have the connectivity with simple plug and play devices.
- Scalable multiprotocol solutions for any application and use case.
- Single Pair Ethernet T1L support for devices and infrastructure.
- Multiprotocol by nature, Cybersecure by design.
- Cost-optimized sustainable design.
